ABOUT ME

AI Engineer (Master's in Distributed Systems & AI) focused on designing and deploying machine-learning models and intelligent systems that drive business impact. Hands-on across the full lifecycle — **ML/DL modeling, scalable AI pipelines, GenAI/LLM integration, and MLOps** — with strong Python, SQL and software-engineering fundamentals. Business-oriented and collaborative, I translate cross-functional needs into reliable production AI within agile teams. Fluent communicator in French and English.

EXPERIENCE

Ofoto — Fine Art Digital Studio

AI Engineer (Full-Stack) | Feb 2025 – Oct 2025 | Casablanca

- **Production AI systems** — designed, deployed and optimized a full AI platform integrating deep-learning models (Stable Diffusion, InstantID) via REST APIs — 99.9% uptime, 500+ concurrent requests.
- **Scalable AI pipelines & services** — Redis async task queues, FastAPI services and PostgreSQL, built for reliability and performance under load (~35% latency).
- **MLOps & deployment** — Dockerized delivery, CI/CD via GitHub, monitoring and security hardening across cloud infrastructure.
- **Cross-functional & agile** — translated business needs into technical solutions, UML-modeled delivery over 5 sprints, contributing to architecture and technical documentation.

FSTM Research Laboratory

Research Engineer — Computer Vision | Feb 2023 – Jul 2023 | Mohammedia

- Built a real-time computer-vision pipeline (face recognition) and automated reporting, removing manual processing.

SELECTED AI PROJECTS

- **GenAI & LLMs** — prompt engineering, LLM API integration, RAG and LLM fine-tuning/evaluation with LangChain/LangGraph and HuggingFace.
- **ML / DL breadth** — supervised, unsupervised and time-series models; CNN/RNN architectures; feature engineering and rigorous model evaluation.
- **Data engineering** — ETL pipelines and large-scale processing with Spark/PySpark; interactive dashboards and visualization.

EDUCATION

ENSET Mohammedia — Master's, Distributed Systems & AI	<i>Bien</i>
FST Mohammedia — Bachelor's, Applied Mathematics	<i>Assez Bien</i>

TECHNICAL SKILLS

Programming	Python (pandas, numpy), SQL, REST APIs, Git, software craftsmanship, Kafka
ML / DL	scikit-learn, TensorFlow, PyTorch, CNN/RNN, supervised/unsupervised & time-series, feature engineering, model evaluation
GenAI & LLMs	Prompt engineering, LLM APIs, RAG, LLM integration, fine-tuning & evaluation
Stats & Data Eng	Probability & inferential statistics, Spark/PySpark, ETL pipelines, cloud platforms
Visualization	Matplotlib, Seaborn, Plotly, Dash
Tools & MLOps	VS Code, Jupyter, Docker, MLflow, CI/CD, model monitoring (Prometheus/Grafana)

LANGUAGES

Arabic — Native · French — B1/B2 · English — B1/B2
