ABOUT ME

AI engineer and recent Master's graduate (Distributed Systems & AI), curious and highly organized, with a passion for applying emerging AI tools to real-world business challenges. Hands-on experience building **AI-powered workflows, automation pipelines and knowledge-management (RAG) systems**, and fluent with leading AI assistants such as **Gemini and ChatGPT**, prompt engineering and LLM-based agents. I enjoy researching new tools, prototyping practical solutions, and writing clear documentation so teams can adopt AI confidently and responsibly.

EXPERIENCE

Ofoto — Fine Art Digital Studio

AI & Automation Engineer | Feb 2025 – Oct 2025 | Casablanca

- AI workflow automation** — designed AI-driven pipelines that automated repetitive tasks and improved throughput, handling 500+ concurrent requests reliably.
- Tool integration & documentation** — integrated third-party AI/ML platforms via APIs and produced clear technical documentation and delivery specs across 5 sprints.
- End-to-end ownership** — independently researched, prototyped, and shipped a production AI application — 99.9% uptime.

FSTM Research Laboratory

Research Intern — Process Automation | Feb 2023 – Jul 2023 | Mohammedia

- Automated a manual workflow end-to-end, including automatic report generation that eliminated repetitive processing.

SELECTED AI PROJECTS

- Knowledge management & document summarization** — built RAG systems (embeddings, semantic search, reranking) for querying and summarizing large document sets in natural language.
- AI agents & no/low-code automation** — designed LLM agents and automated workflows (n8n, Apify, WhatsApp API) to replace repetitive multi-tool processes.
- AI knowledge platform** — interactive Next.js app that turns complex AI concepts into clear, accessible explanations — reflecting my focus on documentation and enablement.

EDUCATION

ENSET Mohammedia — Master's, Distributed Systems & AI	<i>Bien</i>
FST Mohammedia — Bachelor's, Applied Mathematics	<i>Assez Bien</i>

SKILLS

AI Tools & Assistants	Gemini, ChatGPT/GPT, Claude, prompt engineering, LLM agents
Automation	n8n, Apify, workflow automation, API integrations, WhatsApp API
Knowledge & RAG	RAG, embeddings, semantic search, LangChain, LangGraph, Pinecone
Data Analysis	Python, Pandas, NumPy, SQL, data visualization (Power BI, Tableau)
Documentation	Technical writing, guidelines & best practices, training materials
Other Tech	TypeScript, FastAPI, Next.js, Docker, Git/GitHub

LANGUAGES

Arabic — Native · English — B1/B2 (strong written & verbal) · French — B1/B2
