ABOUT ME

Analytical and detail-oriented Data & Reporting Analyst with a Master's in Distributed Systems & AI and strong experience automating reports and operational processes. Skilled in **Python, SQL, Power BI and Excel**, with a track record of building reliable reporting pipelines, optimizing databases and turning operational data into actionable insights. Organized, dependable under pressure, and an effective communicator in **English and French** — committed to quality, accuracy and continuous improvement.

EXPERIENCE

Ofoto — Fine Art Digital Studio

Data & Systems Engineer | Feb 2025 – Oct 2025 | Casablanca

- **Reporting & automation** — automated daily processes and reporting with Python, reducing manual work and improving timeliness and accuracy.
- **Database management** — maintained and optimized a PostgreSQL database with scheduled backups and data-integrity checks to support operational needs.
- **System roll-out & monitoring** — ran pre-launch system checks, monitored usage, identified exceptions, and escalated/resolved issues with users — 99.9% uptime.
- **Solution development & customization** — implemented new IT solutions and customizations, delivered across 5 sprints with clear documentation.

FSTM Research Laboratory

Analyst Intern — Reporting Automation | Feb 2023 – Jul 2023 | Mohammedia

- Built an automated reporting system generating accurate PDF reports for any date range, eliminating manual processing.
- Captured and maintained project-specific data with a strong focus on quality and accuracy.

SELECTED PROJECTS

- **Dashboards & reporting** — analytical dashboards and KPI tracking with Power BI, Tableau and Python (Matplotlib/Plotly) for operational insight.
- **Process automation** — Python and workflow-automation scripts (n8n, APIs) to streamline repetitive reporting and data tasks.
- **Data analysis** — cleaning, consolidating and analyzing operational datasets with pandas/NumPy and SQL to surface exceptions and trends.

EDUCATION

ENSET Mohammedia — Master's, Distributed Systems & AI	Bien
FST Mohammedia — Bachelor's, Applied Mathematics	Assez Bien

SKILLS

Reporting & BI	Power BI, Excel (advanced), Tableau, KPI dashboards, structured reporting
Programming	Python (pandas, NumPy), SQL, VBA, basics of web development (TypeScript/Next.js)
Databases	PostgreSQL, MongoDB, Supabase, data integrity & quality checks
Automation	Process & report automation, ETL pipelines, n8n, API integrations
Analysis	Data cleaning & consolidation, exception analysis, statistics, research
Tools	MS Office Suite, VS Code, Jupyter, Git, Docker

LANGUAGES

Arabic — Native · French — B1/B2 (verbal & written) · English — B1/B2 (verbal & written)
