ELHAKKI-OSSAMA

PROFESSIONAL PROFILE

Junior Data Scientist with a strong background in applied mathematics and artificial intelligence. Hands-on experience deploying machine learning solutions, building data visualizations, and automating data pipelines. Passionate about turning raw data into actionable insights and shipping high-performance predictive models to production.

EXPERIENCE

Full-Stack & Artificial Intelligence Engineer

Ofoto

02/2025 – 10/2025 Casablanca, Morocco

- Deployed an AI image-generation application to production using Docker and Nginx reverse proxy, **cutting release time by 40%** through optimized containerization.
- Managed the full deployment pipeline: FastAPI backend, Vue.js frontend, and Stable Diffusion engine (Automatic1111 + ControlNet), **supporting 500+ concurrent requests**.
- Configured Nginx for load balancing, SSL termination, and routing, **achieving 99.9% service availability**.
- Optimized system performance, **reducing average latency by 35%** and improving the overall user experience.

EDUCATION

Master's Degree in Distributed Systems & Artificial Intelligence – *Grade: Good*

École Normale Supérieure de l'Enseignement Technique

09/2023 – 06/2025 Mohammedia, Morocco

Bachelor's Degree in Applied Mathematics – *Grade: Good*

Faculté des Sciences et Techniques de Mohammedia

09/2020 – 07/2023 Mohammedia, Morocco

High School Diploma – Mathematical Sciences (A) – *Grade: Good*

Lycée Hassan II

2020 Benslimane, Morocco

SKILLS

- Python ML / DL Data Visualisation SQL Analysis
Computer Vision Modelling Data Cleaning Big Data
FastAPI Deployment LLMs / Prompting / AI Agents
Automation Cloud / BI DevOps / MLOps

INTERESTS

Data Visualization
Builds interactive dashboards to simplify complex data analysis.

Continuous Learning
Actively explores advances in AI, ML, and emerging technologies.

Intellectual Challenges
Enthusiastic about tackling complex algorithmic and technical problems.

Travel
Discovers new cultures and explores countries around the world.

KEY ACHIEVEMENTS

★ **Customer Segmentation & Behavioral Analysis**
Built an RFM/clustering segmentation model **increasing user engagement by 15%** and reducing churn by 10%.

🏆 **Predictive Model Improvement**
Optimized LSTM and ML models, **reducing RMSE by 20%** and improving prediction accuracy by 18%.

🚀 **AI Solution Deployment**
Shipped models to production via REST API (FastAPI/Flask), **handling 1 000+ requests/day** in real-world environments.

📈 **Data Pipeline Automation**
Designed automated pipelines with n8n, **cutting manual processing time by 90%**.

CERTIFICATIONS

Google AI Professional Certificate

Practical AI training for business use cases: leveraging generative AI to optimize decision-making, boost creativity, and automate low-value tasks.

HackerRank Certification – SQL

Proficiency in complex queries: JOINS, aggregations, subqueries, and performance optimization.

HackerRank Certification – Python

Advanced algorithms, data structures, data manipulation, and problem solving.

ADDITIONAL TRAINING

Machine Learning and Data Science
Coursera

Workflow Automation with n8n
N8N

AI Image Generation with ComfyUI
ComfyUI

LANGUAGES

Arabic – Native

French – B1/B2 (Intermediate)

English – B1/B2 (Intermediate)
